**IMPORTANT SAFETY INSTRUCTIONS FOR HOUSEHOLD USE ONLY**

READ CAREFULLY BEFORE USE

**WARNING:** To reduce the risk of fire, injury, electric shock, and/or damage to appliance, read and follow these important safety instructions carefully.

1. To avoid fire, explosion, or injury, inspect hand vacuum and charger, DO NOT use a damaged vacuum cleaner or charger.
2. If vacuum cleaner is not working as it should, or has been dropped, damaged, left outdoors, soaked in water, return it to SharkNinja Operating LLC for examination, repair, or adjustment.
3. DO NOT immerse in water or other liquids.
4. DO NOT handle charger or vacuum cleaner with wet hands.
5. DO NOT use outdoors.
6. DO NOT use on wet surfaces.
8. Use only the provided charger. DO NOT INSCRIBE appliance, even if it is severely damaged, as the battery may explode in a fire.
9. DO NOT abuse the charger cord, pull cord around sharp edges or corners, or use charger with an extension cord. Plug charger directly into a wall outlet.
10. DO NOT immerse in water or other liquids.
11. DO NOT use your appliance in the rain. NEVER tase vacuum cleaner with wet hands.
12. DO NOT use outdoors.
13. DO NOT use on wet surfaces.
14. Use only the provided charger. DO NOT INSCRIBE appliance, even if it is severely damaged, as the battery may explode in a fire.
15. DO NOT abuse the charger cord, pull cord around sharp edges or corners, or use charger with an extension cord. Plug charger directly into a wall outlet.
16. Use only the provided charger. DO NOT INSCRIBE appliance, even if it is severely damaged, as the battery may explode in a fire.
17. To avoid fire, explosion, or injury, inspect hand vacuum and charger, DO NOT use a damaged vacuum cleaner or charger.
18. If the appliance fails to work properly, unplug it from the electrical outlet, and consult the troubleshooting section in this manual.
19. Do not use the hand vacuum in rain.
20. Keep all openings away from face, fingers uncovered feet, or loose clothing.

**IMPORTANT:** To register your Shark Cordless Hand Vacuum, visit register.shark.com.

**MAXIMIZING THE LIFE OF YOUR LITHIUM-ION BATTERY**

1. Charge the hand vacuum battery at temperatures below 50°F (10°C) or above 104°F (40°C). The battery will not charge at temperatures over 122°F (50°C).
2. Charge the vacuum at temperatures below 50°F (10°C) or above 122°F (50°C).
3. To avoid fire, use of incorrect charger may create a risk of fire when used with the vacuum cleaner.
4. Use of incorrect charger may create a risk of fire when used with the vacuum cleaner.
5. To avoid fire, use of incorrect charger may create a risk of fire when used with the vacuum cleaner.

**ASSEMBLING THE HAND VACUUM**

IMPORTANT: The dust cup filter must always be used when operating the hand vacuum. DO NOT operate the hand vacuum without the dust cup filter.

1. Verify that the dust cup filter is inside, then reattach the dust cup to the nozzle.
2. The motorized brush can be used to vacuum short pile carpet or rugs. Install the dust cup filter, then attach it to the vacuum cleaner with the On/Off switch in the On position.
3. The vacuum cleaner may be moved by hand or by using the charger. The vacuum cleaner may be turned on by pressing the On/Off button on the side of the hand vacuum.
4. The crevice tool can be used to clean narrow, hard-to-reach places. To attach the crevice tool, insert the attachment into the air-intake nozzle.

NOTE: Lithium-ion batteries take approximately 6 hours to charge completely.

**CHARGING YOUR HAND VACUUM**

1. Make sure the charger plug is inserted firmly into the charger. The charger plug must be connected securely to the hand vacuum.
2. Plug the charger into a wall outlet. The charging indicator light will illuminate when the hand vacuum is charging.

**LITHIUM-ION BATTERY**

- **Lithium-ion** battery, like all Lithium-ion products, will naturally decrease in capacity over time from the 100% capacity of a new battery.
- **Lithium-ion battery does not come fully charged. Prior to first use, charge completely.** During first use, due to tolerances for conditioning your Lithium-ion battery, failure to charge it may result in a 10% to 30% loss of power.
- **WARNING:** DO NOT touch the motorized brush while it is in motion. WARNING: Do not touch the motorized brush while it is in motion.

**WARNING:** Use of incorrect charger may create a risk of fire when used with the vacuum cleaner.

**WARNING:** Use of incorrect charger may create a risk of fire when used with the vacuum cleaner.

**WARNING:** Use of incorrect charger may create a risk of fire when used with the vacuum cleaner.

**WARNING:** Use of incorrect charger may create a risk of fire when used with the vacuum cleaner.

**WARNING:** Use of incorrect charger may create a risk of fire when used with the vacuum cleaner.

**CHANGING & CLEANING THE DUST CUP FILTER**

This vacuum cleaner is designed to operate with a dust cup filter. When the battery no longer holds a charge, it should be removed from the hand vacuum and recycled. The battery should be recycled or disposed of in a responsible manner. When your Lithium-ion battery needs to be replaced, dispose of or recycle it in accordance with local ordinances or regulations. In cases where it is illegal to place Lithium-ion batteries in the trash or in a municipal solid waste stream, return spent batteries to the nearest authorized battery recycling center or retailer for recycling. Contact your local recycling center for information on where to drop off the spent battery.

**BATTERY REMOVAL AND DISPOSAL**

This product uses a Lithium-ion rechargeable and recyclable battery. When the battery no longer holds a charge, it should be removed from the hand vacuum and recycled. The battery should be recycled or disposed of in a responsible manner. When your Lithium-ion battery needs to be replaced, dispose of or recycle it in accordance with local ordinances or regulations. In cases where it is illegal to place Lithium-ion batteries in the trash or in a municipal solid waste stream, return spent batteries to the nearest authorized battery recycling center or retailer for recycling. Contact your local recycling center for information on where to drop off the spent battery.

**TRROUBLESHOOTING**

The hand vacuum will not operate

1. Battery needs to be replaced. Battery is damaged and needs to be replaced. Try using a different electrical outlet to charge.

Motorized brush will not work

1. The metal contact pins on the motorized brush are not in contact with the connector slots of the unit. Use of incorrect charger may create a risk of fire when used with the vacuum cleaner.

Hand vacuum will not pick up or suction is weak

1. Dust cup full. Empty the dust cup. Dust cup filter needs cleaning or replacement. Clean or replace to ensure full suction.
2. Vacuum needs to be recharged.

Dust is escaping from the hand vacuum

1. The dust cup filter is not installed correctly. Remove it and replace.

2. The dust cup filter has a hole or a puncture and needs to be replaced.
