Removing debris before using your Steam Mop.

We recommend the use of Shark Vacuum or Sweeper to clean up dust and debris before using your Steam Mop.

Shark Steam Mops provide sanitization studies were conducted under controlled test conditions, using Rectangle Mop Pad is essential for residue removal.

with a mix of one part vinegar and two parts water. Remember, a clean mop will have more effectiveness will diminish. For more stubborn cases, you may need to rinse the floor chemicals and polishes previously used on your floors. With regular use these chemicals may be removed by the heat and steam action. It is always recommended to test an area of the carpet to be cleaned before proceeding. Be sure not to over-saturate the area with water. Remove excess water with a clean towel before proceeding.

Please consult your flooring manufacturer’s care and maintenance instructions before applying any cleaning products or solutions, including vinegar.

TIP:

On surfaces that have been treated with wax or some no wax floors, the sheen may be removed by the heat and steam action. It is always recommended to test an area of the carpet to be cleaned before proceeding. Be sure not to over-saturate the area with water. Remove excess water with a clean towel before proceeding.
