

NINJA COFFEE BAR

Ninja Easy Frother™ Assembly Instructions

Your Ninja Easy Frother™ is ideal for transforming your everyday milk into foamy froth; after repeated use and cleaning your frother may come unassembled. It's very simply to put back together!

1) Start by holding the press in your hand with the lid facing down and the post with screw end facing up.

2) Place the disassembled parts back on the post in the following order:

- 1) Spring**
- 2) Mesh**
- 3) Feet**
- 4) Nut**

3) Screw the Nut on the press post, I usually use my fingers- no tool required!
